Re: Reissuance of NPDES Permits
WA0026336 – Site 1
WA0026328 – Site 2
WA0026719 – Site 3

Dear Mr. Bielka:

We are reissuing the revised National Pollutant Discharge Elimination System (NPDES) permits for the facilities referenced above. The permits authorize each facility to discharge pollutants from the outfall identified in the permit to the specified receiving water. The permits are transmitted with this letter. The permits may be downloaded at this web address: <https://www.epa.gov/npdes-permits/washington-npdes-permits>.

The EPA did not receive any comments on the draft permits during the public comment period.

Since no comments were received on the draft permit, no changes have been made between the draft and final permit. This means that the permit can become effective immediately upon issuance because there are no permit conditions that can be appealed. The EPA has set the effective date of the permit to be May 1, 2020.

Sincerely,

Daniel D. Opalski
Director
